

*Lowest Cost ~ Bottom Line!*

**100% Recycled Material Products**

# Aerial Drop Training

**Rumber® Materials Inc.** has a patent to produce products from 100% recycled tire rubber and plastics. This has created a revolution in the way we think about everyday products. Rumber is the **environmentally friendly** material, a natural choice for a number of specialized products. Bottom line, **Rumber products** are your **most cost-effective** option because they are easy to maintain and they last longer over time.

**Rumber products** are impervious to fluids, oil, and U.V. rays. They also repel gasoline, diesel, and other fuels, making them the perfect choice for aerial drop training. They also prevent FOD on runways and the tarmac.

With unprecedented durability and attributes that clearly out-perform traditional materials, Rumber increases the value and life of the product. The result is **less downtime, fewer replacement costs and extended life.**
